

Productname: APRO®-Sol

product information

APRO®-Sol. A unique solvent, specially developed for external cleaning of glue equipment, based on natural solvents and fully biodegradable.

General Description

APRO®-Sol is a unique product formulated from naturally occurring substances. APRO®-Sol is an ideal safe natural replacement for dangerous cleaners based on halogenated hydrocarbons and aromatic solvents. By using natural substances we ensure that APRO®-Sol is safe for people, the environment and materials. APRO®-Sol has been specially developed for cleaning of both hotmelt machinery and cold glue equipment.

The Problems

- Glue equipment becomes dirty with glue residues.
- Machinery, components, conveyor belts, chains, floors all become soiled with glue residues.
- Cleaning with 1,1,1,-trichloroethene or other harmful solvents is slow, expensive, and dangerous for operators health and the environment.
- Poorly cleaned machinery leads to failure and loss of production.
- The use of a pleasant smelling, safe cleaning product increases staff motivation and leads to better performance.
- Cleaning with dangerous traditional solvents and so is often delayed, due to the high labour costs involved.

The Answer

- APRO®-Sol provides a safe, cost effective answer without sacrificing production efficiency.
- APRO®-Sol gives such good cleaning results that machinery cleaned this way is less prone to failure and loss of production.
- Cleaning with APRO®-Sol is pleasant experience, so staff are motivated to produce good results.

Special Features

- APRO®-Sol has excellent cleaning performance
- APRO®-Sol is free of aromatics or halogenated hydrocarbons
- APRO®-Sol has a very pleasant odour, unlike many other noxious smelling solvents
- APRO®-Sol is safe and pleasant to work with
- APRO®-Sol is a pure natural product, readily biodegradable and non toxic
- APRO®-Sol is not hazardous to health or the environment
- APRO®-Sol is water emulsifiable

Typical Applications

- External surfaces of glue equipment
- Tools contaminated with glue residues
- Floors and walls contaminated with glue residues
- In short: anything contaminated with glue residues
- Glue machinery components cleaning during overhaul and refurbishment

Productname: APRO[®]-Sol

product information

Market segments

- Cardboard industry
- Povichions industry
- Packaging industry in common
- Every industry which involves packaging

Remarks

Do not spray in open fire. Keep away from sources of ignition

Method of use

APRO[®]-Sol should always be used neat. Important is to mix well before use. APRO[®]-Sol can be used by spraying or by dipping.

- Spraying: Spray on the APRO[®]-Sol after shaking. Leave to penetrate. Wipe off, brush off or spray off with water.
- Dipping: Immerse workpiece in the APRO[®]-Sol. Take out and let excess product run back into the tank and spray off with water.
