

adhesive supply unit

12 and 24 ltr. with up to 2 gear pumps

Technical data

operating voltage	230/400 VAC PNPE
frequency	50/60 Hz
sensor	PT100 or Ni120
melt rate 12 ltr.	up to 12 kg/h, due to adhesive
melt rate 24 ltr.	up to 24 kg/h, due to adhesive
max. quantity of gearpumps	2x 0,6-10 ccm/rev. or 2x double pumps 0,6-4,8 ccm/rev. or 1x 20/30 ccm/rev.
weight	approx. 200 kg
heating power per hose/head	max. 2.000 watts
electrical connector	due to temperature sensor
temperature range	20-200 °C
glue pressure	up to 10 MPa (100 bars)
air connection	BSP 3/8
air pressure	600 kPa (6 bars)

APRO adhesive supply units are used in different industries, as for example the hygiene or the filter manufacturing industry. Up to the requirements we select the right technique to generate the best solution for the application.

Our standard features of the alphapro series:

- well known standard PLC, motors and frequency converters, no expensive self-developed solutions
- Profinet interface for OEMs
- isolated contacts for low-/high temperature/system ready/fault alarm
- standard sensors are PT100 or Ni120
- weekly timer
- operator language selectable
- surfaces with hotmelt contact are nonstick coated
- one separate by-pass valve for each gear pump, individually controlled, with the possibility to pre-set a constant, basic glue pressure
- control box rotateable for optimised access

Available options to extend the adhesive supply unit:

- pressure control for startup sequence
- continuous pressure control
- up to 3 level controls
- analog input for each gear pump
- encoder speed signal (per pump)
- 4 colour indication tower
- mounted on wheels
- hotmelt inlet for pre melter(s)
- connection for return hose systems

Our pump selection:

Our gear pumps are compatible with the FP-series. The available standard sizes are 0,6, 1,2, 2,4, 4,5, 10, 20 and 30 ccm/rev.

All our products:

- hotmelt systems
- heated hoses
- applicator heads
- pattern controller
- coating machines
- print heads for hotmelt
- spare parts for all brands

We have ready solutions and develop individually for the:

- hygiene industry
- converting industry
- packaging industry
- filter industry
- wood working industry
- automotive industry

Your benefits @ APRO:

- we implement your needs
- we have many years of professional competence (since 1992)
- we are fast and flexible
- we offer unlimited service availability and provide best quality products
- you will be our focus of attention
